LUKA MATOVIC

Frontend Developer | React | TypeScript | Node.js | PostgreSQL
(331)/308-4904 • lukamatovic1994@gmail.com • linkedin.com/in/lukamatovic • github.com/Luka1906 • Chicago, IL

Summary

Frontend-focused developer with experience building React and TypeScript applications, including data-heavy interfaces, validation workflows, and REST API integrations. Also experienced with Node.js, Express, and PostgreSQL for authentication, database design, and deployment.

Experience

Ka Technology
Chicago, United States

Frontend Developer
05/2026 - Present

- Building frontend workflows for an AI-powered document-processing platform that turns large sets of HOA documents into structured reports, reducing manual document review.
- Built a multi-section validation interface for reviewing AI-extracted data, showing supporting document sources and extraction reasoning for each value, with confidence-based statuses, filters for values requiring review, and validation progress tracking.
- Integrated report creation and document extraction with FastAPI REST APIs using TanStack Query, implementing polling-based status tracking to display extraction progress and asynchronous processing states in the UI.
- Refactored application-wide styling by replacing hardcoded CSS values with reusable design tokens, improving UI consistency and making global design changes easier.

University of Belgrade, Faculty of Organizational Sciences
Belgrade, Serbia

Frontend Developer Intern
10/2022 - 09/2023

- Maintained and enhanced the E-Business Department (eLab) website, used by 5,000+ students and staff.
- Designed and developed a prototype website for the FONcast podcast, expanding the department's digital presence with a dedicated platform for podcast content.
- Contributed to code reviews and debugging across multiple university web projects, helping improve code quality and resolve implementation issues.

Starbucks
Chicago, United States

Shift Manager
10/2023 - Present

- Lead shifts of 6–10 employees, coordinating daily operations, inventory management, sales tracking, and issue resolution in a high-volume environment.

Projects

FitFlow — Full-Stack Fitness Tracking Application
https://fitflow-luka.netlify.app/

- Built and deployed a full-stack fitness tracking app for logging workouts, hydration, and weight, setting goals, and tracking progress with React, Node.js, Express, and PostgreSQL.
- Designed the PostgreSQL schema and built the Express REST API from scratch, implementing session-based authentication and CRUD operations for fitness data.
- Built interactive dashboards and 7-, 30-, and 90-day trend views to visualize activity, goal progress, and historical changes over time.

SerbShop - Full-Stack E-Commerce Application
https://serbshop.netlify.app/

- Built a full-stack e-commerce application with React, Node.js, Express, and MongoDB, implementing product search and filtering, persistent cart management, and a complete checkout experience.
- Built authentication and payment functionality using JWT, Stripe, and SendGrid, implementing user registration and login, secure checkout, and password recovery flows across the full application.

Education

University of Belgrade, Faculty of Organizational Sciences
Belgrade, Serbia

M.S. in Information Systems | GPA: 4.0 / 4.0
2023

Skills

Languages: JavaScript · TypeScript · HTML · CSS

Frontend: React · Next.js · Tailwind CSS · TanStack Query · TanStack Router · Redux Toolkit · shadcn/ui · Chart.js

Backend: Node.js · Express · REST APIs

Database: PostgreSQL · MongoDB

Authentication: Auth0 · JWT · Session-Based Authentication

Tools & DevOps: Git · GitHub · Docker · Postman · Figma · Vite · Jira
